AN OLD KINGDOM FUNERARY SLAB STELA OF A MAN IN ALEXANDRIA NATIONAL MUSEUM

Marzouk AMAN

Faculty of Arts, Assiut University
E.mail: dr-aman2010@hotmail.com

ABSTRACT
Publication of an old Kingdom slab stela exhibited in Alexandria National Museum (inventory number 20 (formerly Cairo Museum CG 1661=JE 15569), including comments on the style, iconography, paleography, and dating criteria. It was excavated by the Egypt Exploration Fund at Dendera in 1898. It was transferred to Alexandria National Museum 2003.

KEYWORDS
Dendera, Seshemneferpepy, Titles, Offering list, Economical, medical and priestly careers, Social status of the owner.

INTRODUCTION
Among the collections of the Alexandria National Museum are a collection of stelae. Slab stela no. 20 caught my eye when I saw it the first time because it has a large figural field of a man is depicted in raised relief, with no offering table, just an inscribed offering list. This paper will study and classify this stela in order to determine: the date of the stela; the owner of this stela; and his career and social status. The object in question was found by the Egypt Exploration Fund at 18981 at Dendera,2 and entered

---

1Cf. the stela of Neferseshem Pepy (British Museum EA1263; James, Hieroglyphic Texts, I, 38, pl. xxxvi.
2During the period of Pepy II onwards, Dendera developed its own local features, reflected in its mastabatombs of Dynasties 6-8, in particular, a series of niches along the principal façade surmounted by a
the Egyptian Museum as JE 15569, being published by Ludwig Borchardt in the Catalogue Générale.\(^1\) It was transferred to the Alexandria National Museum for its inauguration on 31 December 2003.

**DESCRIPTION**

This object (fig.1, pl.1) is a stone slab stela, of a type that goes back to the First and Second Dynasties.\(^2\) Such pieces were of many different shapes; usually they were bearing inscriptions, reliefs, or paintings. They usually show the tomb owner in front of an offering table, sometimes standing. They were set into the brick mastabas of the local cemeteries of the late Old Kingdom and the First Intermediate Period. A great number of such stelae from the Sixth to the Twelfth Dynasty were discovered in the cemeteries of Naga el-Deir and Dendera in Upper Egypt.\(^3\) The stela under study is a rectangular example of unpainted limestone, measuring 52cm by 41cm, and is generally in good condition. The surface was carefully prepared and is smooth although the lower edges are slightly broken. A large figural field of a man is depicted in raised relief on the right, with an inscribed offering list, which contains six main horizontal lines of hieroglyphic text, the top line across the whole width, the other five lines facing the owner of the stela. All the text is cut in fine, sharp, sunken relief with much individual detail in the signs.

**REPRESENTATION**

The owner is depicted with such southern facial features as fleshy lips and pug nose. He holds a long staff in his right hand and a scepter in his left, which passes across his figure.\(^a\) He stands on the right, facing left, wearing a shoulder length wig with over lapping rows of locks which leaves the ear exposed,\(^b\) a broad collar and two bracelets. The owner is represented wearing a short pointed skirt with peculiar transverse ribbings and vertical piping (pleated skirt).\(^c\) A belt is shown in raised relief in the surface of the garment with diagonal stripe across the kilt.\(^d\) The man’s wig and kilt are detailed.

**REMARKS ON THE REPRESENTATION AND THE STYLE**

\(^a\) The owner carrying the stick with his left hand and the scepter in his right is a common style in the Old Kingdom representations.\(^4\) The scepter is shown in raised relief in the surface of the kilt as usual. This posture had been known probably as early as the Third Dynasty and became common during the Old Kingdom,\(^5\) the Middle Kingdom\(^6\) and

5. Cf. El-Masry, “An Unpublished Stela from the Ancient Cemetery of Thinis,” 272; Harpur, *Decoration in Egyptian Tombs*, 128-129, 456,Fig.19,459,Fig.25,461,Fig.30,462,Fig.32.
later. The staff and the scepter are indicative of a high status,\(^1\) cf. the staff and scepter which frequently held by high officials in the Old Kingdom. Examples include: the false door of Neferseshemkhufu (British Museum EA1282, Fourth Dynasty);\(^2\) part of a false door of Nyankhre (British Museum EA658, Fifth Dynasty);\(^3\) another slab-stela of Seshemneferpepy-Senna (British Museum EA1263, Sixth Dynasty);\(^4\) door-reveals from the tomb of Qar (British Museum EA1319B, Sixth Dynasty);\(^5\) and inscriptions of Tjetu I (Giza G.2001, late Sixth Dynasty).\(^6\) Middle Kingdom examples include: stela National archaeological museum, Athens L131;\(^7\) and the stela of Sobekhetep (Alexandria National Museum, no. 223, early Middle Kingdom).\(^8\)

b The long wig\(^9\) with braided shoulder-length hair descending from a center part and gradually become wider at the end was common style during Sixth Dynasty. The marked concavity of the flaring contour of the wig is particularly characteristic of this era; before the Sixth Dynasty the sides of the wig are usually straighter.\(^10\) Sixth Dynasty examples include: the inscription of Idu,\(^11\) inscriptions of Idu’s son Qar and Nakhti, Qar’s brother;\(^12\) the stelae of Imydepet-Bau (British Museum EA128)\(^13\) and Iny (British Museum EA1480);\(^14\) the false doors of Qar (British Museum EA1342)\(^15\) and Tjetu I (Giza G.2001, late Sixth Dynasty);\(^16\) and the other slab-stela of Seshemneferpepy-Senna (British Museum EA1263).\(^17\)

c The style of this kilt\(^18\), which sticks out in front in a triangular projection, was popular throughout Fifth\(^19\), and Sixth Dynasties, for Sixth Dynasty examples see: false door of Qar (British Museum EA1341);\(^20\) door-reveals from the tomb of Qar (British Museum

REMARKS ON THE TEXT AND COMMENTARY

e The writing of the htp-di-nsw formula with this arrangement of the signs is the most common found on the monuments of the Fourth to Thirteenth Dynasties. For examples, see: statue of Kawab (Boston 34-4-1, Fourth Dynasty); false door and architrave of Ptahshepses (British Museum EA682, Fifth Dynasty); inscriptions of Kafr Ammar coffin No.535; false doors of Khentyka (Sixth Dynasty); false door of Qar (British Museum EA1342, Sixth Dynasty); stela of Imydepet-Bau (British Museum EA128, Sixth Dynasty); stela of Iny (British Museum EA1480, Sixth Dynasty); inscriptions of Tjeto I (Giza G.2001, late of the Sixth Dynasty); stela of Antef (Cairo CG 2009); and Rudjahau (British Museum EA159; both Eleventh Dynasty); Cairo stela JE 37515 (Twelfth Dynasty); stela of Ankhib (Canadian private collection, Twelfth/Thirteenth Dynasty); stela of Dienreankh (Cairo CG 20684); stela of Dedusobek (Cairo TR 30.10.17.5, Twelfth/Thirteenth Dynasty).

f The two connected elements of the name of Osiris are common in the Sixth Dynasty; for examples, see: false doors of Khentyka, (mastaba dated to the early years of Pepy I’s reign); stela of Imydepet-Bau (British Museum EA128); stela of

Hynehes (Cairo CG.1695); inscription of Tjet I (Giza G.2001, late Sixth Dynasty). The feature of the two connected elements of Osiris name becomes less common after the Old Kingdom, when the two signs are usually at least slightly separated. Kanawati has noted that from the beginning of Teti’s reign a new development is observed in the inscriptions of the burial chambers and sarcophagi: the seated god determinative of Osiris is eliminated, the name being written \( \text{Osiris} \). This feature is found in the stela under study and other inscriptions throughout the time of Sixth Dynasty as in the tombs of the vizier Neferseshemre, Ankhmahor, Mereruka, Khentika, Khentika's son, Khentika, the latter probably belonging to the reign of Pepy I, and the stela of Hynehes (Cairo CG.1695, Sixth Dynasty). However one can notice also the determinative of the god Osiris in the name \( \text{Wsir} \) is as often omitted as it is present in Sixth Dynasty inscriptions, cf. the false doors of Khentyka at Saqqara, the stela of Khennu (Cairo CG.1615), the stelae of Ti, Cairo CG.1590, from Abydos and Imydepet-Bau (British Museum EA128, Sixth Dynasty), the inscriptions of Tjetu I (Giza G.2001, late the Sixth Dynasty), where the determinative is present.

\( \text{qdw} \) of the title \( \text{nb qdw} \) was inscribed under the sign \( \text{d} \) front of the sign \( \text{w} \), this construction occurs repeatedly in the Sixth Dynasty inscriptions, see for examples: slabs of Bia from Saqqara nos.Z247-8, and the inscription of Nby.

During the Old Kingdom, Herakleopolitan Period, and Middle Kingdom, Osiris is associated with Busiris, his frequent title in the Fifth and Sixth Dynasties being Lord of Busiris, examples being: the architraves and false door of Werriryenptah (British Museum EA80, Fifth Dynasty), the stela of Weni (Cairo CG.1599, Sixth Dynasty), Neithhotep, Merrettjetihetepti, Ipiemses and Ipiankhu-Ipi (Teti pyramid cemeteries, Herakleopolitan Period). On the other hand, on the slab stela of Seshemneferpepy (British Museum EA1263), the title of Osiris \( \text{nb qdw} \) is omitted.

2. Simpson, Western Cemetery, pl. xxii[a].
5. Firth and Gunn, Teti Pyramid Cemeteries, II, pl. 58[6].
13. Simpson, Western Cemetery, pl. xxii[a].
15. Fischer, “The Inspector of the \( \text{sx} \) of Horus, Nby”, 170, pl. xxv, Fig.1.
17. Lambert and Hall, Hieroglyphic Texts from Egyptian Stelae, VI , pl.1, 2, 3, 7.
20. James, Hieroglyphic Texts, I, 38, pl. xxxvi.
In the Eleventh Dynasty the usual titles of Osiris are \(\text{\textcircled{a}}\) and \(\text{\textcircled{b}}\). During the reign of Sesostris I the title \(\text{ntr}^3\) is added. Under Sesostris III all the titles are usually dropped, except \(\text{hnty}^3 \text{Imntyw}^4\).

It is worth mentioning that the arrangement of \(\text{prt}^5 \text{hrw}\) with the determinative \(\text{\textcircled{a}}\) (elongated bread) + \(n + \) the title of the deceased + his name or only his name without titles were common from Sixth Dynasty to Herakleopolitan Period (Ninth/Tenth Dynasties): cf. the stela of Tjepiemsaes (Teti Pyramid Cemetery), \(^2\) five other stelae of Seshemneferpepy and of Tjuti-Resi, \(^3\) the false door and sarcophagus of Meni (all from Dendera), \(^4\) the stela of Weni, \(^5\) the false door of Qar (British Museum EA1342), \(^6\) the inscriptions of Tjetu I (Giza, G.2001 – all Sixth Dynasty), \(^7\) the stelae of Mereri and Sennesu (from Dendera, Seventh Dynasty), \(^8\) the stela of Neithhotep (same necropolis, perhaps Herakleopolitan Period), \(^9\) the stela of Sheni (Teti pyramid cemeteries, Herakleopolitan Period), \(^10\) and stela of Imhotep (same necropolis and date, Herakleopolitan Period).

The title \(\text{smr}^11 \text{waty}^12\) is a high honorific title. \(^12\) It is the commonest title of the courtiers \(^13\) in the Old Kingdom \(^14\). The common translation of this title is 'sole companion' \(^15\). The title \(\text{smr}^11 \text{waty}^12\) was inscribed with vertical stick. When the scribe wants to write \(\text{smr}\) only he writes it with the determinative \(\underline{\text{A345}}\). \(^16\) While he wants to write \(\text{smr}^11 \text{waty}^12\) he writes the vertical stick instead of the determinative. For Old Kingdom examples see: stela of Khnumhotpe (British Museum EA1166, Fifth Dynasty), \(^17\) the inscriptions of Tjetu I (Giza G.2001, late the Sixth Dynasty), \(^18\) the false doors of Khentyka, \(^19\) false door (Copenhagen National Museum 5129), \(^20\) the stela of Weni, \(^21\) Sixth Dynasty, false door of Qar, (British Museum EA1342, Sixth Dynasty) \(^22\).

inscriptions of Nepepi, Abydos, reign of Merenre⁴, and Mereri stelae from Dendera, Seventh Dynasty⁵.

"hry –ḥb(t) 'Lector priest, he who carries the ritual-book' the second word in the compound is a feminine, ḥbt means 'ritual-book' (hry), though the ending t is almost always omitted². Lector priest was responsible for directing and reciting the daily rituals in the cult establishment in which he was employed. As reliefs of tombs and temples of the Old Kingdom, he played an essential role in the funeral and temple ceremonies⁴. hry –ḥb is written in the stela under study without determinative⁵. The title "hry –ḥb(t) appears as early as the Second Dynasty, usually held by the crown prince.⁶ It is a common title in the Old Kingdom. See for examples: Cone of Khue(or Khuue) (British Museum EA199, Fourth or Fifth Dynasty)⁷, architrave of Washptah, (British Museum EA1278, Fifth Dynasty)⁸, stela of Eni, (British Museum EA1485, Sixth Dynasty)⁹, a lintel from Qar's mastaba, false door of Qar, (British Museum EA1342, Sixth Dynasty)¹⁰, and stela of Imydepet-Bau, (British Museum EA128, Sixth Dynasty)¹¹.

"hry sšt3 was wrongly determined with (F51) instead of (U30A) and sšt3 isn't inscribed. Cf. the inscriptions of the offering niche belonging to the Sixth Dynasty high priest of Ptah, Sabu/Ibebi from Saqqara, (Egyptian Museum, Cairo, nos. CG1418, 1419, 1561)¹².

The title 'hry sšt3 n mdw ntr means 'Provy to the secret of the god's words, secretary of the sacred writings'¹⁴. In our stela, the sign (P8A) is inscribed instead of (Gardiner S43) in the word mdw. A type is sometimes characteristic of the Sixth Dynasty texts; see for example the inscriptions of Qar, (Giza Sixth Dynasty)¹⁵ Fischer mentioned that the title "hry sšt3 n mdw ntr is suitable to any lector priest wšb, it does not seem to be a very haughty title¹⁶. However, the term mdw ntr in the title "hry sšt3 mdw

An Old Kingdom Funerary Slab Stela

SHEDET (5) | 2018

$ntr$ probably refers to medical books, Cf. An inscription of an oculist and court physician of the Six Dynasty Period who was entitled "he who masters the secrets of the $mdw$ $ntr$" and stela of physician Erienakhet, Giza necropolis, the reign of Merykare, who was entitled $hry$ $sšt$ $mdw$ $ntr$. In another slab stela of Neferseshemppy, British Museum EA1263 the title $hry$ $sšt$ $mdw$ $ntr$ 'Provy to the secret of the god's words' was replaced $hry$ $sšt$ $n$ $ḥmt$ (sd$jtw$) $ntr$ 'privy to the secrets of the royal documents'.

In another slab stela of Neferseshemppy, British Museum EA1263 the title $hry$ $sšt$ $mdw$ $ntr$ 'Provy to the secret of the god's words' was replaced $hry$ $sšt$ $n$ $ḥmt$ (sd$jtw$) $ntr$ 'privy to the secrets of the royal documents'.

1. The name of Seshemneferpepy was recorded by Ranke: $sSm$-$nfr$-$plp$.
In our stela his surname Senna was added, $sSm$-$nfr$-$ppy$, $rn$ $f$ $nfr$ $smn$, 'Seshemneferpepy, his good name is Senna'. The sign (Gardiner T22) in the surname Senna was replaced. Seshemneferpepy, Senna, lived during the time of late Sixth Dynasty. He built his tomb in Dendera in the cemetery behind the temple of Dendera. As was mentioned in the stela under study, Seshemneferpepy, surnamed Senna, was the sole companion $smr$ $wty$, The lector priest $hry$ $-hb$, and the privy to the secret of the God’s words $hry$.

13. Petrie, Dendereh 1898, 1,4,11, Pl.30. The slab stela under study wasn't mentioned in the publication of Petrie, Dendereh 1898, among other stelae of Seshemneferpepy from Dendera.
From the comparison of the titles and offices of this stela with other stelae of the owner one can say that he was also privy to the secrets of the god’s treasure,( stela of British Museum EA1263), ‘the overseer of the storehouses’, (stela of Manchester Museum). According to other slab stelae which were mentioned by Petrie, and CG1659, he held the other titles: “overseer of writing, ‘sealer of the king of Lower Egypt’ while Fischer translated it “treasurer of the King of Lower Egypt.”

Another slab stela, (Metropolitan Museum 98.4.6) was found in an N-S pit no. 511 next to the mastaba of Seshemneferpepy, Senna, at Dendera by Egypt Exploration Fund.

excavations 1898. The owner of this slab –stela called Hetepsi, she was contemporary of Seshemneferpepy. Her stela appears to be by the same hand as the decorations of the mastaba of Seshemneferpepy. Hetepsi bears the titles King’s Sole Ornament and Priestess of Hathor Mistress of Dendera, and in her latter capacity she carries a sistrum in her hand. Both of she and Seshemneferpepy held priestly titles associated them with Hathor Mistress of Dendera. Perhaps this woman was a wife of Seshemneferpepy.

CONCLUSION

The stela under consideration came from Dendera. Petrie, Borchardt, Kitchen, Fischer dated the tomb of Seshemneferpepy through the end of the Sixth Dynasty period, while Wolfgang Schenkel dated his texts after Sixth Dynasty. As already shown in the foregoing pages, the stylistic, many of palaeographic, iconographic, and epigraphic details of the stela indicate a date of End of the Sixth Dynasty such as the owner carrying the stick with his left hand and the scepter in his right, the style of the wig, the style of the kilt, the belt with diagonal stripe across the kilt, the writing of the $\text{hpt-dl-nsw}$ formula with this arrangement of the signs, the two connected elements of the name of Osiris, the title of Osiris lord of Busiris, the arrangement of $\text{prt hrw}$ with the determinative (elongated bread) + n + the title of the deceased + his name, The title $\text{smr wfrty}$ which is the commonest title of the courtiers through sixth Dynasty, the title $\text{hry} - \text{hby(t)}$ and the title
